BUSINESS DIVISION

Tyler R. Sturdevant, Chief

ACKNOWLEDGMENTS—Many persons participated in the various activities of the 1977 Census of Retail Trade. Primary direction of the program was performed by Shirley Kallek, Associate Director for Economic Fields, and Richard B. Quanrud, Assistant Director for Economic and Agriculture Censuses.

This report was prepared in the Business Division under the general direction of Tyler R. Sturdevant, Chief. Michael G. Farrell, Assistant Chief for Census Programs (until May 1980), and Bobby E. Russell, his successor, were responsible for overall planning and management of the Division's census programs. They also coordinated activities with other divisions.

Planning and implementing this report were under the direction of Bobby E. Russell, Chief, Retail Census Branch, with primary staff assistance by Dennis P. Pike, Mark E. Wallace, and Merrihew Scarborough. Alvin H. Barten, assisted by Sidney O. Marcus, coordinated activities, specifications, and procedures with the other economic censuses. Computer programs were developed under the general supervision of Heyward D. Glisson, Assistant Division Chief for Data Processing. William C. Wester, Chief, Census Programming Branch, assisted by Judith A. McKay and George D. Minier, was primarily responsible for planning and implementing the programs. Quality control and sample design were under the direction of Nash J. Monsour, Assistant Chief of Research and Methodology, with primary staff assistance by Robert C. Havlin and Mitchell Trager. Staff assistance was provided by Paul Shapiro, Senior Statistician, assisted by Sol D. Helfand. Carl J. Bostrom, Assistant Division Chief for Current Programs, provided valuable assistance in coordinating the current survey interface.

Systems and procedures for mailout and clerical processing were developed in the Economic Surveys Division by Roger H. Bugenhagen, Chief, assisted by Andrew L. Grieco, Robert E. Crowther, and Joel Richardson. Clerical procedures were developed by Robert Brand, assisted by Haydn R. Mearkle, Helen L. Barton, and Beverly M. Eng. Walter E. Neece, assisted by C. Harvey Monk, had staff responsibility for industry classification procedures. Administrative record processing specifications were developed by Lawrence A. Blum and John M. Sullivan under the direction of Samuel Schweid. Electronic computer programs for check-in and administrative records were developed and supervised by Robert G. Willner and Donald H. Danbury under the direction of Paul E. Poissant. Data input procedures were developed by Leonard M. Tauber and quality control procedures by Jean F. Biggs.

Forms design was performed in the Administrative Services Division, Henry J. Husmann, Chief. The entire staff of the Forms and Mail Management Branch made significant contributions in the planning, design, review, and composition of the forms.

Within the Publications Services Division, many individuals made significant contributions in publication planning and design, editorial review, composition, and printing procurement. These operations were

performed under the direction of Raymond J. Koski, Chief, assisted by Milton S. Andersen, Gerald A. Mann, Wayne H. Massey, Jacqueline A. Gans, Charles C. Huntley, Nicholas Preftakes, Helen M. Curtis, Rosemary B. Vance, and Robert Warunek.

Clerical and data keying operations were performed in the Data Preparation Division at Jeffersonville, Ind., under the direction of Don L. Adams, Chief, assisted by Robert L. Allen, Rebecca Lamon, and George Wilson. The clerical geocoding effort was directed by Wendell McManus.

The geographic coding procedures and computer programs were developed in the Geography Division under the direction of Jacob Silver, Chief, assisted by Silla G. Tomasi, Gerald Cranford, Terence D. McDowell, Dan Harding, Phyllis Krause, Walter Yergen, and Rose J.A. Quarato.

Computer processing was directed by C. Thomas DiNenna, Chief, Computer Services Division. John E. Halterman, Jesse J. Verdeja, Willie E. Clark, and Norman W. Larsen provided staff assistance.

Lawrence Cox, Statistical Research Division, and Lawrence E. Cornish, Systems Software Division, made significant contributions by developing special-purpose computer programs for disclosure analysis and publication preparation.

Donald E. Young, Lawrence H. Lyons, Robert S. Taylor, and Dayton P. Jorgenson, of the Office of the Assistant Director for Economic and Agriculture Censuses, participated in overall planning and review of the census operations.

Special acknowledgment is also due the many businesses whose cooperation has contributed to the publication of these data.

[illegible]

AIDS TO TABLE USE

ALL ESTABLISHMENTS VERSUS ESTABLISHMENTS WITH PAYROLL

Most retail trade tables present data for two major categories of establishments: All establishments and establishments with payroll.

The term "all establishments" includes those with no payroll ("mom and pop" operators) and those with payroll. The number and sales of establishments with no payroll is determined by subtracting data for establishments with payroll from data for all establishments.

As in the table below:

| | |
|------|--|
| 394 | (Number of total establishments) |
| -324 | (Number of establishments with payroll) |
| 70 | (Number of establishments with no payroll) |

The sales of the 70 establishments is \$1,366 (000).

For several kinds of business, data are not shown for all establishments. Instead, a double asterisk (**) appears (see Abbreviations and Symbols). This situation occurs because the data come from two sources, and one source classifies by kind of business in greater detail than the other.

For the establishments with no payroll, the Bureau of the Census obtains on computer tape limited information extracted by the Internal Revenue Service from Federal income tax returns. Classifications for establishments with payroll come from Census Bureau records developed from one of the Bureau's mail canvasses. The establishments with no payroll are coded in less detail than the establishments with payroll. Therefore, the combined data for all establishments (establishments with no payroll plus establishments with payroll) are presented in less

kind-of-business detail than are data for establishments with payroll alone.

DOLLAR VALUES

All dollar values presented in this report are expressed in current dollars, i.e., 1977 data are expressed in 1977 dollars and 1972 data in 1972 dollars.

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

| | |
|--------|---|
| (D) | Withheld to avoid disclosing data for individual companies. |
| (NA) | Not available. |
| (NC) | Not comparable. |
| n.e.c. | Not elsewhere classified. |
| pt. | Part. |
| r | Revised. |
| SCSA | Standard Consolidated Statistical Area. |
| SIC | Standard Industrial Classification. |
| SMSA | Standard Metropolitan Statistical Area. |
| (U) | Unincorporated. |
| (X) | Not applicable. |
| — | Zero. |
| * | Independent city. |
| ** | Data not provided because establishments with no payroll are classified only at the next higher level. |
| ± | Data provided only for establishments with payroll. Establishments without payroll are included at the next broader kind-of-business level. |

INTRODUCTION

HISTORY OF THE ECONOMIC CENSUSES

The economic censuses are comprehensive and periodic canvasses of the Nation's industrial and business activities. Taken by the Census Bureau, a part of the U.S. Department of Commerce, the censuses provide a detailed statistical profile of a large segment of the national economy.

The first economic census of the United States was conducted as part of the 1810 decennial census, when inquiries on manufacturing were included with the census of population. All other decennial censuses through 1900, except in 1830, contained questions on manufacturing. In 1904 the quinquennial census of manufacturing began. It was conducted every fifth year until 1920 and every second year from 1921 to 1939. Although some distributive trade data were collected in the decennial census of 1840, the first census of business was taken in 1929. It covered only retail and wholesale trades, but beginning with the second business census in 1933 and in succeeding censuses various services also have been included. Business censuses were subsequently taken for 1935 and 1939 and after a wartime interruption were resumed in 1948. Beginning in 1954, and continuing in the censuses of 1958, 1963, 1967, and 1972, the business censuses have been conducted concurrently with the censuses of manufactures and mineral industries. Beginning with the 1967 censuses, Congress authorized the economic censuses to be taken at 5-year intervals covering years ending in "2" and "7".

USES OF THE ECONOMIC CENSUSES

The economic censuses are the primary source of facts about the structure and functioning of the economy and, therefore, provide information essential for both government and business. The censuses furnish an important part of the framework for such composite measures as the national accounts. In forecasting and planning, they are especially useful in analyzing the national product in terms of the transactions that determine its size and composition. The economic censuses also provide weights and benchmarks for indexes of industrial production, productivity, and price, all of which are essential for understanding current economic developments.

Manufacturers and distributors make widespread use of the economic censuses in establishing measures of their potential markets by areas, kinds of businesses, and kinds of products. Management in various industries and trades get facts from them for use in economic or sales forecasting, analyzing sales performance, laying out sales territories, allocating advertising budgets, and locating plants, warehouses, and stores. Trade organizations use census statistics for insight into changes in the structure of industry. State and local governments use the geographic detail that describes the patterns of economic change in individual communities. Local business organizations and research groups do too.

Following every census, reports are purchased by thousands of businesses and other users; likewise, census facts are widely disseminated by trade associations, business journals, and the daily press. Volumes containing census statistics are available in most major public and college libraries.

AUTHORITY AND SCOPE OF THE ECONOMIC CENSUSES

The economic censuses are required by law under title 13 of the United States Code, sections 131, 191, and 224, which direct that they be taken at 5-year intervals. The 1977 Economic Censuses covered manufacturing, mining and quarrying, construction industries, retail trade, wholesale trade, service industries, and selected transportation activities. The next economic censuses are scheduled to be taken in 1983 covering the year 1982.

CENSUS OF RETAIL TRADE

The 1977 Census of Retail Trade, part of the 1977 Economic Censuses, covered retail trade as defined in the Standard Industrial Classification (SIC) Manual.¹ It included all establishments primarily engaged in selling merchandise for personal or household consumption and rendering services incidental to the sale of the goods. It excluded governmental organizations classified in the covered industries except for liquor stores operated by State and local governments. Data for direct sellers (SIC 5963) with no paid employees and post exchanges, ship stores, and similar establishments operated on military posts by agencies of the Federal Government are not included. The basic tabulations in this volume do not include data for central administrative offices (CAO's), captive warehouses, and other units which service or are auxiliary to retail establishments within the same organization. Data for CAO's and auxiliaries will be found in a subsequent report issued as part of the subject series of the 1977 Enterprise Statistics survey.

For the 1977 Census of Retail Trade, large- and medium-size firms, plus all firms known to operate more than one establishment, were sent questionnaires to be completed and returned to the Bureau by mail. For most very small firms, including those with no paid employees, data from existing records of the Internal Revenue Service (IRS) and the Social Security Administration (SSA) were used instead. The two sources produced basic information on location, kind of business, volume of sales and payrolls, and number of employees. In addition, more detailed information for selected kinds of business was obtained on the various questionnaires.

¹Standard Industrial Classification Manual: 1972. For sale by Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Stock No. 4101-0066. Price \$6.75. 1977 Supplement. Stock No. 003-005-00176-0. Price 90 cents.

Appendix A gives a more detailed explanation of census coverage and methodology.

CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the operations of an individual establishment or business. However, the number of establishments in a kind of business classification is not considered a disclosure so this information may be given even though other information is withheld.

GEOGRAPHIC AREAS COVERED

The reports in this volume present data for the following areas:

1. The United States as a whole.
2. Each State.
3. Each standard consolidated statistical area (SCSA) defined as of December 31, 1977, meeting the criteria outlined in the 1975 Standard Metropolitan Statistical Areas manual.¹ An SCSA is an area used to facilitate the presentation and analysis of data for concentrations of metropolitan populations. It includes two or more contiguous standard metropolitan statistical areas which meet specific criteria of size, urban character, integration, and contiguity of urbanized areas.
4. Each standard metropolitan statistical area (SMSA) defined as of December 31, 1977, meeting the criteria outlined in the 1975 Standard Metropolitan Statistical Area manual.¹ An SMSA is an integrated economic and social unit with a large population nucleus. Each SMSA consists of one or more counties meeting standards of population and metropolitan character, except in New England where towns and cities rather than counties are the basic geographic units.
5. The 250 largest counties.
6. The 250 largest cities.

In addition to the appropriate State, SCSA, SMSA, and selected county and city data included in the individual State reports as well as in the U.S. Summary report, the State reports include data by kind of business for the following additional areas:

1. The area within the State outside standard metropolitan statistical areas (available only on microfiche; see below).
2. Each county or county equivalent.²
3. Each municipality of 2,500 inhabitants or more incorporated as cities, boroughs, villages, or towns.² In addition, the following areas are included:
 - a. Special economic urban areas (SEUA's):
 1. Townships in New Jersey and Pennsylvania with 10,000 inhabitants.³

¹ Standard Metropolitan Statistical Areas, Revised Edition 1975. For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Stock No. 041-001-00101-8. Price \$2.30.

² Those defined as of January 1, 1977.

³ According to 1970 Census of Population or subsequent special census.

2. Towns in New England with an urban population (based on the census of population definitions) of 2,500 inhabitants or more or a total population of 10,000 or more.³

- b. Census-defined unincorporated places with 25,000 inhabitants or more.³

For the economic censuses, boroughs in Alaska and New York and towns in New York and Wisconsin are not included.

The Major Retail Centers series of reports presents data for each central business district (CBD) in SMSA central cities and SMSA cities with 50,000 inhabitants or more that chose to participate in delineation of a CBD, and each major retail center other than a CBD in an SMSA.

MICROFICHE AND COMPUTER TAPES

The data in this volume are only a part of the complete report that is available on microfiche, prints from microfiche, and computer tapes. The unpublished tables available in these modes are:

1. United States
 - Table 5A. Standard Metropolitan Statistical Areas Ranked by Volume of Retail Sales: 1977
2. Each State
 - Table 4A. Sales Per Capita and Selected Ratios for Standard Metropolitan Statistical Areas: 1977

SPECIAL TABULATIONS

Special tabulations of data collected in the 1977 Census of Retail Trade may be obtained on computer tape or in tabular form. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications.

Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Business Division, Bureau of the Census, Washington, D.C. 20233.

To discuss a special tabulation before submitting specifications, call 301-763-5282.

SUMMARY OF FINDINGS

Data from the 1977 Census of Retail Trade show that North Dakota's 6,681 retail stores had sales totaling \$2.2 billion, an increase of 77.0 percent over sales reported in 1972 when the last such census was taken.

Grocery stores sales in 1977 accounted for 15.6 percent of the State's total sales by retailers compared to 16.9 percent in 1972. Other leading retail kinds of business in 1977 were new car dealers with 20.9 percent, department stores with 6.8 percent, gasoline service stations with 9.0 percent, and eating places with 6.0 percent.

There were 1,224 inhabitants for each grocery store in the State in 1977, 746 inhabitants for each eating place, 4,835 inhabitants for each furniture store, 5,954 inhabitants for each jewelry store, and 27,958 inhabitants for each department store.

Annual sales for all retailers in the State averaged \$336,740 per establishment compared to \$195,403 in 1972. In 1977, grocery stores averaged \$668,770 per establishment; department stores, \$6,692,000; eating places, \$157,170; furniture stores, \$320,489; and jewelry stores, \$119,593.

The per capita retail sales for grocery stores in the State were \$546; department stores, \$239; eating places, \$210; furniture stores, \$66; and jewelry stores, \$20.

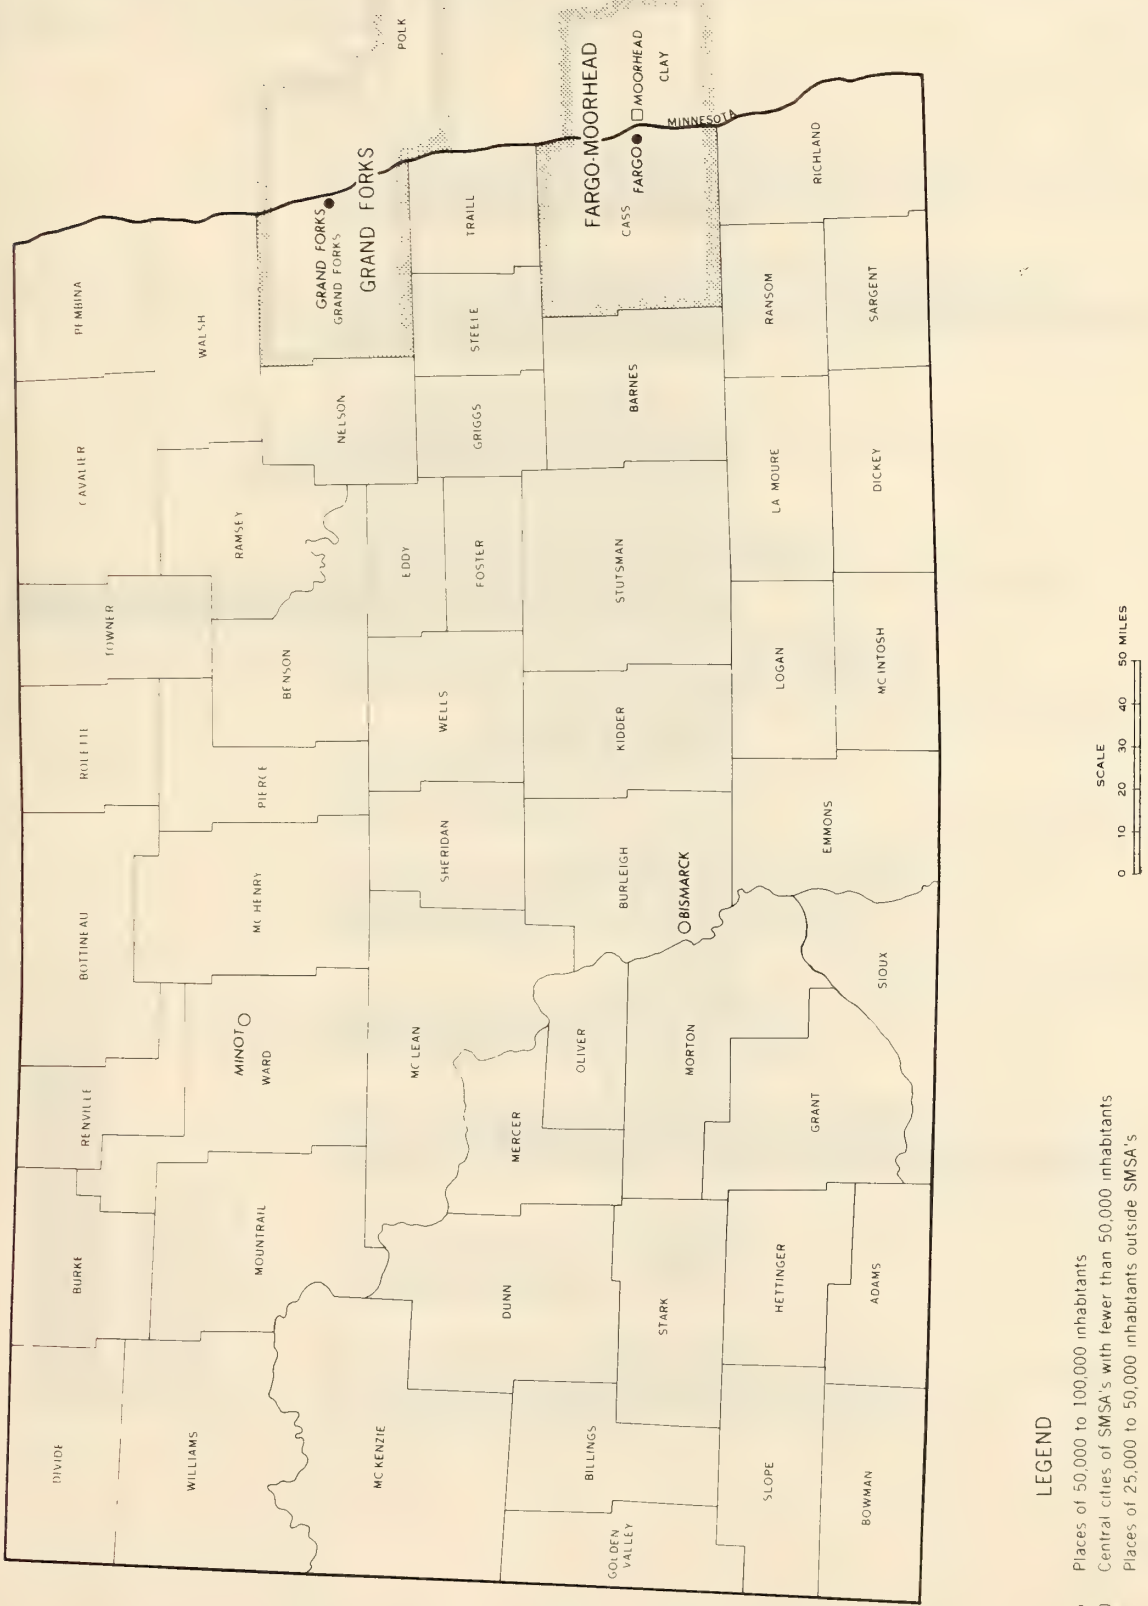

For establishments with payroll in 1977, the sales per employee for retailers in the State averaged \$51,261. Eating places reported sales per employee of \$12,168 which contrasts sharply with the \$127,297 recorded by mobile home dealers.

The 1977 payroll of retailers in the State amounted to \$256 million, up 82.9 percent from 1972. Payroll as a percent of sales of establishments with payroll averaged 11.8 percent for all retailers, 8.3 percent for gasoline service stations, and 27.6 percent for eating places.

There were 42,440 paid employees (full- and part-time) engaged in retail trade in the State as of mid-March 1977. Eating places were the largest employers with 10,943 employees, followed by grocery stores with 4,578 employees, and new car dealers with 3,841 employees.

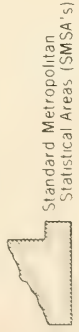

Cass County led the counties in the State, accounting for 19.6 percent of total sales by retailers. Fargo had the largest sales among the cities in the State, accounting for 16.4 percent.

SUMMARY OF FINDINGS

Data from the 1977 Census of Retail Trade show that Ohio's 82,404 retail stores had sales totaling \$35.6 billion, an increase of 56.0 percent over sales reported in 1972 when the last such census was taken.

Grocery stores sales in 1977 accounted for 20.7 percent of the State's total sales by retailers compared to 20.6 percent in 1972. Other leading retail kinds of business in 1977 were new car dealers with 18.3 percent, department stores with 13.4 percent, gasoline service stations with 8.8 percent, and eating places with 7.6 percent.

There were 1,524 inhabitants for each grocery store in the State in 1977, 877 inhabitants for each eating place, 6,722 inhabitants for each furniture store, 8,321 inhabitants for each jewelry store, and 17,541 inhabitants for each department store.

Annual sales for all retailers in the State averaged \$431,574 per establishment compared to \$275,666 in 1972. In 1977, grocery stores averaged \$1,044,390 per establishment; department stores, \$7,808,681; eating places, \$219,179; furniture stores, \$407,782; and jewelry stores, \$166,073.

The per capita retail sales for grocery stores in the State were \$685, department stores, \$445; eating places, \$250; furniture stores, \$61; and jewelry stores, \$20.

For establishments with payroll in 1977, the sales per employee for retailers in the State averaged \$53,273. Eating places reported sales per employee of \$15,401 which contrasts sharply with the \$114,036 recorded by mobile home dealers.

The 1977 payroll of retailers in the State amounted to \$4.3 billion, up 51.1 percent from 1972. Payroll as a percent of sales of establishments with payroll averaged 12.3 percent for all retailers, 7.2 percent for gasoline service stations, and 25.2 percent for eating places.

There were 651,255 paid employees (full- and part-time) engaged in retail trade in the State as of mid-March 1977. Eating places were the largest employers with 171,615 employees, followed by grocery stores with 85,728 employees, and department stores with 100,029 employees.

Cuyahoga County led the counties in the State, accounting for 15.2 percent of total sales by retailers. Columbus had the largest sales among the cities in the State, accounting for 6.4 percent.

SUMMARY OF FINDINGS

Data from the 1977 Census of Retail Trade show that Oklahoma's 28,119 retail stores had sales totaling \$9.2 billion, an increase of 67.5 percent over sales reported in 1972 when the last such census was taken.

Grocery stores sales in 1977 accounted for 22.1 percent of the State's total sales by retailers compared to 21.1 percent in 1972. Other leading retail kinds of business in 1977 were new car dealers with 19.6 percent, department stores with 7.8 percent, gasoline service stations with 7.1 percent, and eating places with 7.3 percent.

There were 948 inhabitants for each grocery store in the State in 1977, 636 inhabitants for each eating place, 4,203 inhabitants for each furniture store, 5,894 inhabitants for each jewelry store, and 24,873 inhabitants for each department store.

Annual sales for all retailers in the State averaged \$328,181 per establishment compared to \$200,672 in 1972. In 1977, grocery stores averaged \$712,398 per establishment; department stores, \$6,619,294; eating places, \$158,179; furniture stores, \$301,943; and jewelry stores, \$173,607.

The per capita retail sales for grocery stores in the State were \$751; department stores, \$266; eating places, \$249; furniture stores, \$72; and jewelry stores, \$29.

For establishments with payroll in 1977, the sales per employee for retailers in the State averaged \$53,765. Eating places reported sales per employee of \$14,385 which contrasts sharply with the \$146,573 recorded by mobile home dealers.

The 1977 payroll of retailers in the State amounted to \$985 million, up 69.1 percent from 1972. Payroll as a percent of sales of establishments with payroll averaged 11.2 percent for all retailers, 7.4 percent for gasoline service stations, and 25.2 percent for eating places.

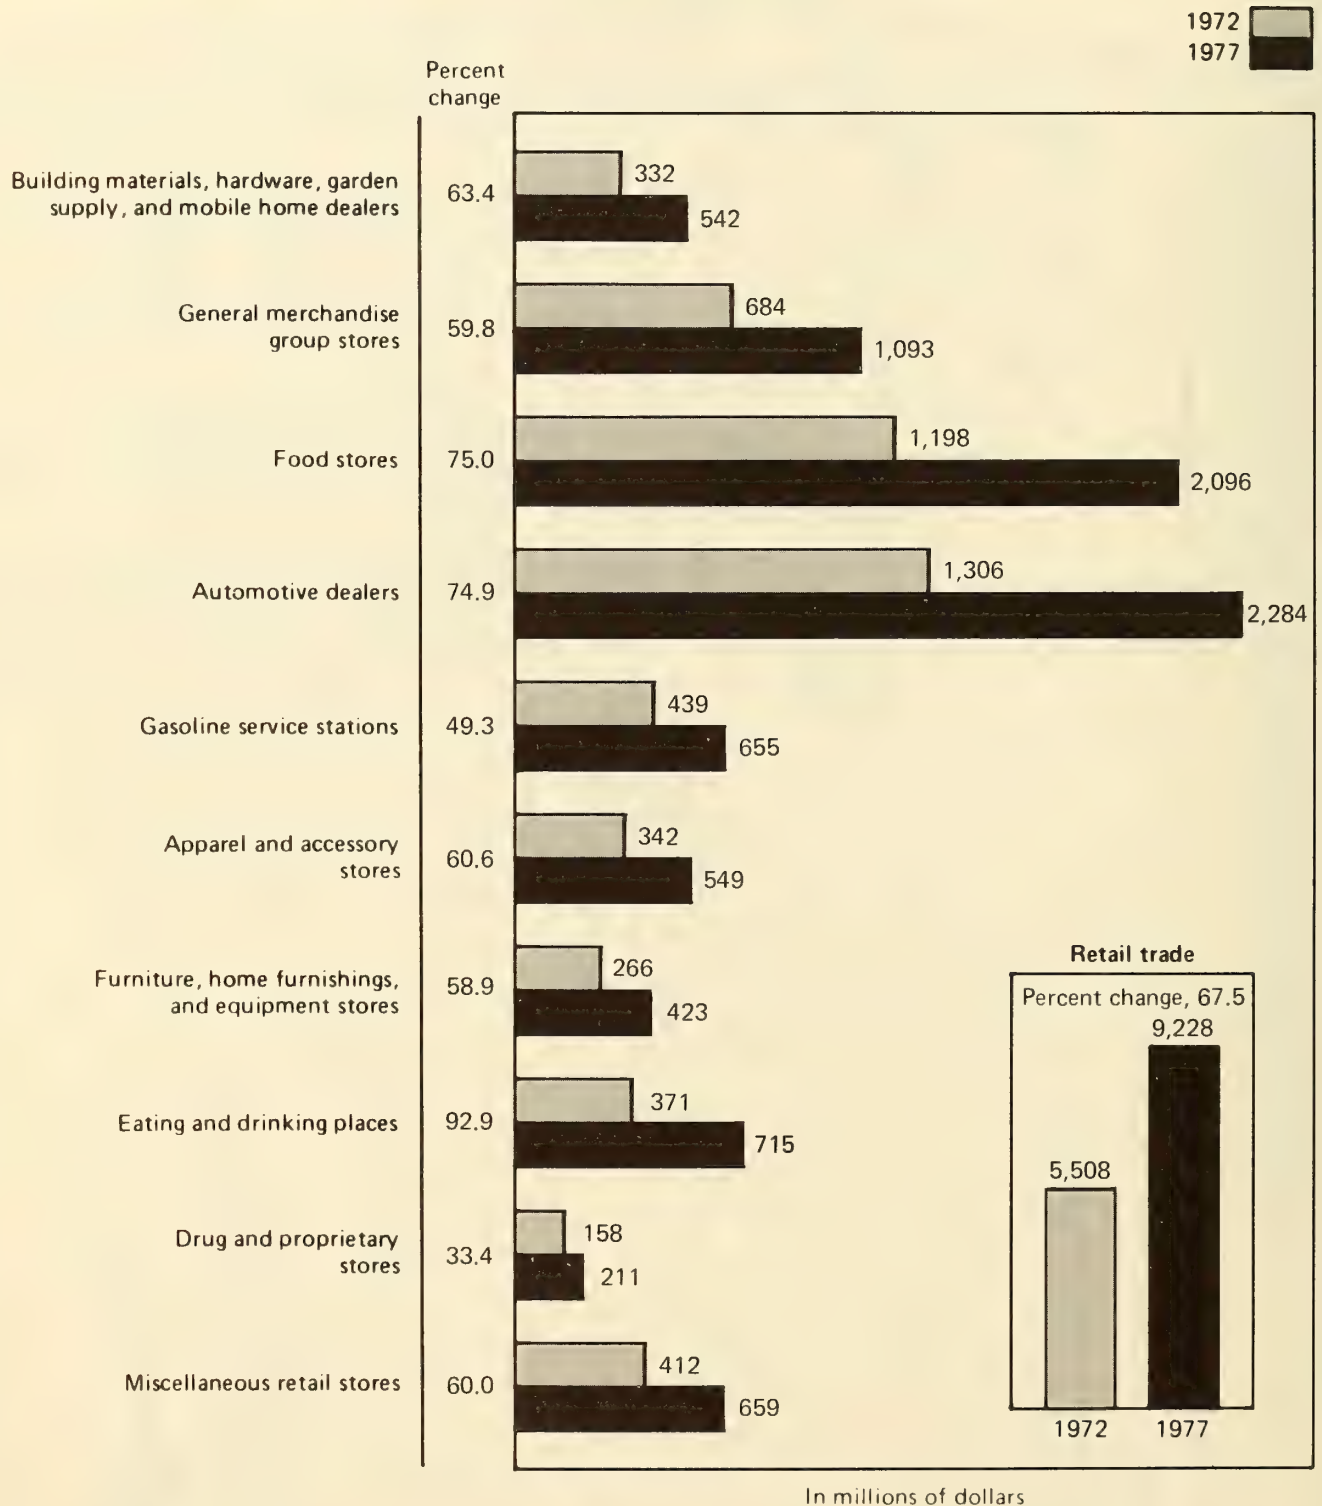

There were 163,454 paid employees (full- and part-time) engaged in retail trade in the State as of mid-March 1977. Eating places were the largest employers with 45,734 employees, followed by grocery stores with 23,872 employees, and department stores with 14,662 employees.

Oklahoma County led the counties in the State, accounting for 26.1 percent of total sales by retailers. Oklahoma City had the largest sales among the cities in the State, accounting for 19.7 percent.

SUMMARY OF FINDINGS

Data from the 1977 Census of Retail Trade show that Oregon's 22,788 retail stores had sales totaling \$9.3 billion, an increase of 80.8 percent over sales reported in 1972 when the last such census was taken.

Grocery stores sales in 1977 accounted for 18.5 percent of the State's total sales by retailers compared to 22.2 percent in 1972. Other leading retail kinds of business in 1977 were new car dealers with 17.1 percent, department stores with 10.5 percent, gasoline service stations with 7.0 percent, and eating places with 8.0 percent.

There were 1,157 inhabitants for each grocery store in the State in 1977, 665 inhabitants for each eating place, 4,891 inhabitants for each furniture store, 5,857 inhabitants for each jewelry store, and 28,201 inhabitants for each department store.

Annual sales for all retailers in the State averaged \$410,216 per establishment compared to \$252,986 in 1972. In 1977, grocery stores averaged \$876,365 per establishment; department stores, \$12,139,716; eating places, \$218,845; furniture stores, \$375,338; and jewelry stores, \$147,249.

The per capita retail sales for grocery stores in the State were \$757, \$430 in department stores, \$329 in eating places, \$77 in furniture stores, and \$25 in jewelry stores.

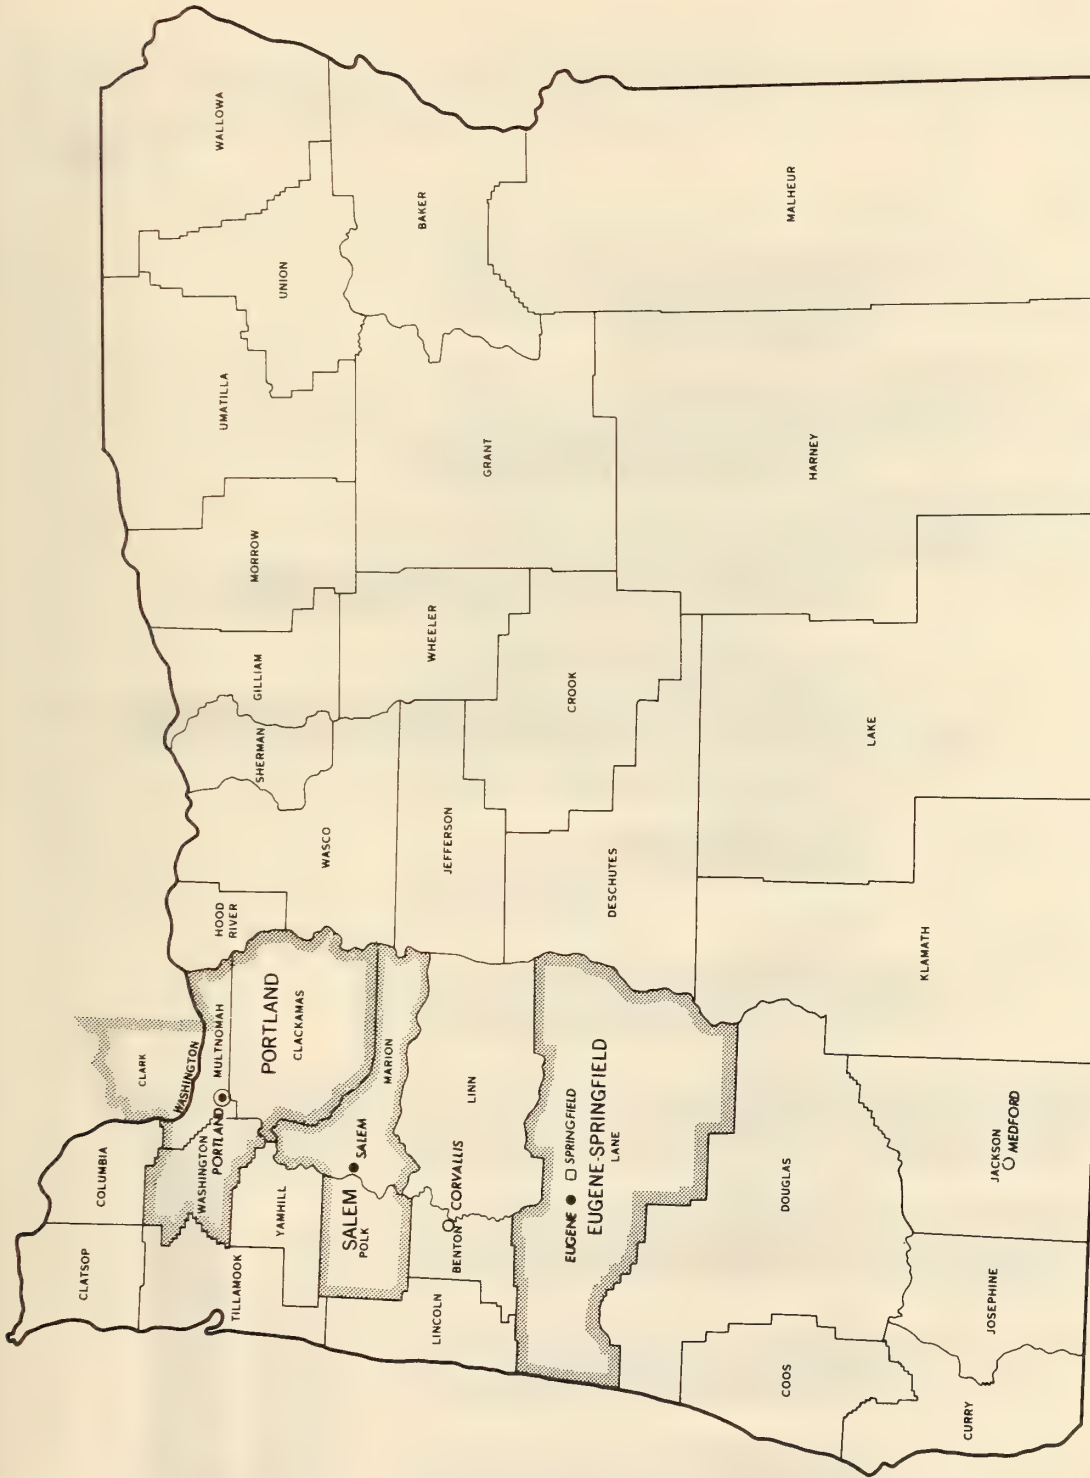

For establishments with payroll in 1977, the sales per employee for retailers in the State averaged \$57,319. Eating places reported sales per employee of \$15,513 which contrasts sharply with the \$150,936 recorded by mobile home dealers.

The 1977 payroll of retailers in the State amounted to \$1.1 billion, up 72.4 percent from 1972. Payroll as a percent of sales of establishments with payroll averaged 12.2 percent for all retailers, 7.2 percent for gasoline service stations, and 26.2 percent for eating places.

There were 158,407 paid employees (full- and part-time) engaged in retail trade in the State as of mid-March 1977. Eating places were the largest employers with 47,862 employees, followed by grocery stores with 17,548 employees, and department stores 16,059 employees.

Multnomah County led the counties in the State, accounting for 26.6 percent of total sales by retailers. Portland had the largest sales among the cities in the State, accounting for 18.5 percent.

OREGON

LEGEND

- Places of 100,000 or more inhabitants
- Places of 50,000 to 100,000 inhabitants
- Central cities of SMSA's with fewer than 50,000 inhabitants
- Places of 25,000 to 50,000 inhabitants outside SMSA's

SUMMARY OF FINDINGS

Data from the 1977 Census of Retail Trade show that Pennsylvania's 98,719 retail stores had sales totaling \$37.2 billion, an increase of 48.8 percent over sales reported in 1972 when the last such census was taken.

Grocery stores sales in 1977 accounted for 20.2 percent of the State's total sales by retailers compared to 20.1 percent in 1972. Other leading retail kinds of business in 1977 were new car dealers with 16.8 percent, department stores with 11.6 percent, gasoline service stations with 7.7 percent, and eating places with 6.6 percent.

There were 1,309 inhabitants for each grocery store in the State in 1977, 865 inhabitants for each eating place, 6,183 inhabitants for each furniture store, 7,572 inhabitants for each jewelry store, and 23,220 inhabitants for each department store.

Annual sales for all retailers in the State averaged \$377,275 per establishment compared to \$246,873 in 1972. In 1977, grocery stores averaged \$830,510 per establishment; department stores, \$8,452,225; eating places, \$179,097; furniture stores, \$340,405; and jewelry stores, \$146,509.

The per capita retail sales for grocery stores in the State were \$634; department stores, \$364; eating places, \$207; furniture stores, \$55; and jewelry stores \$19.

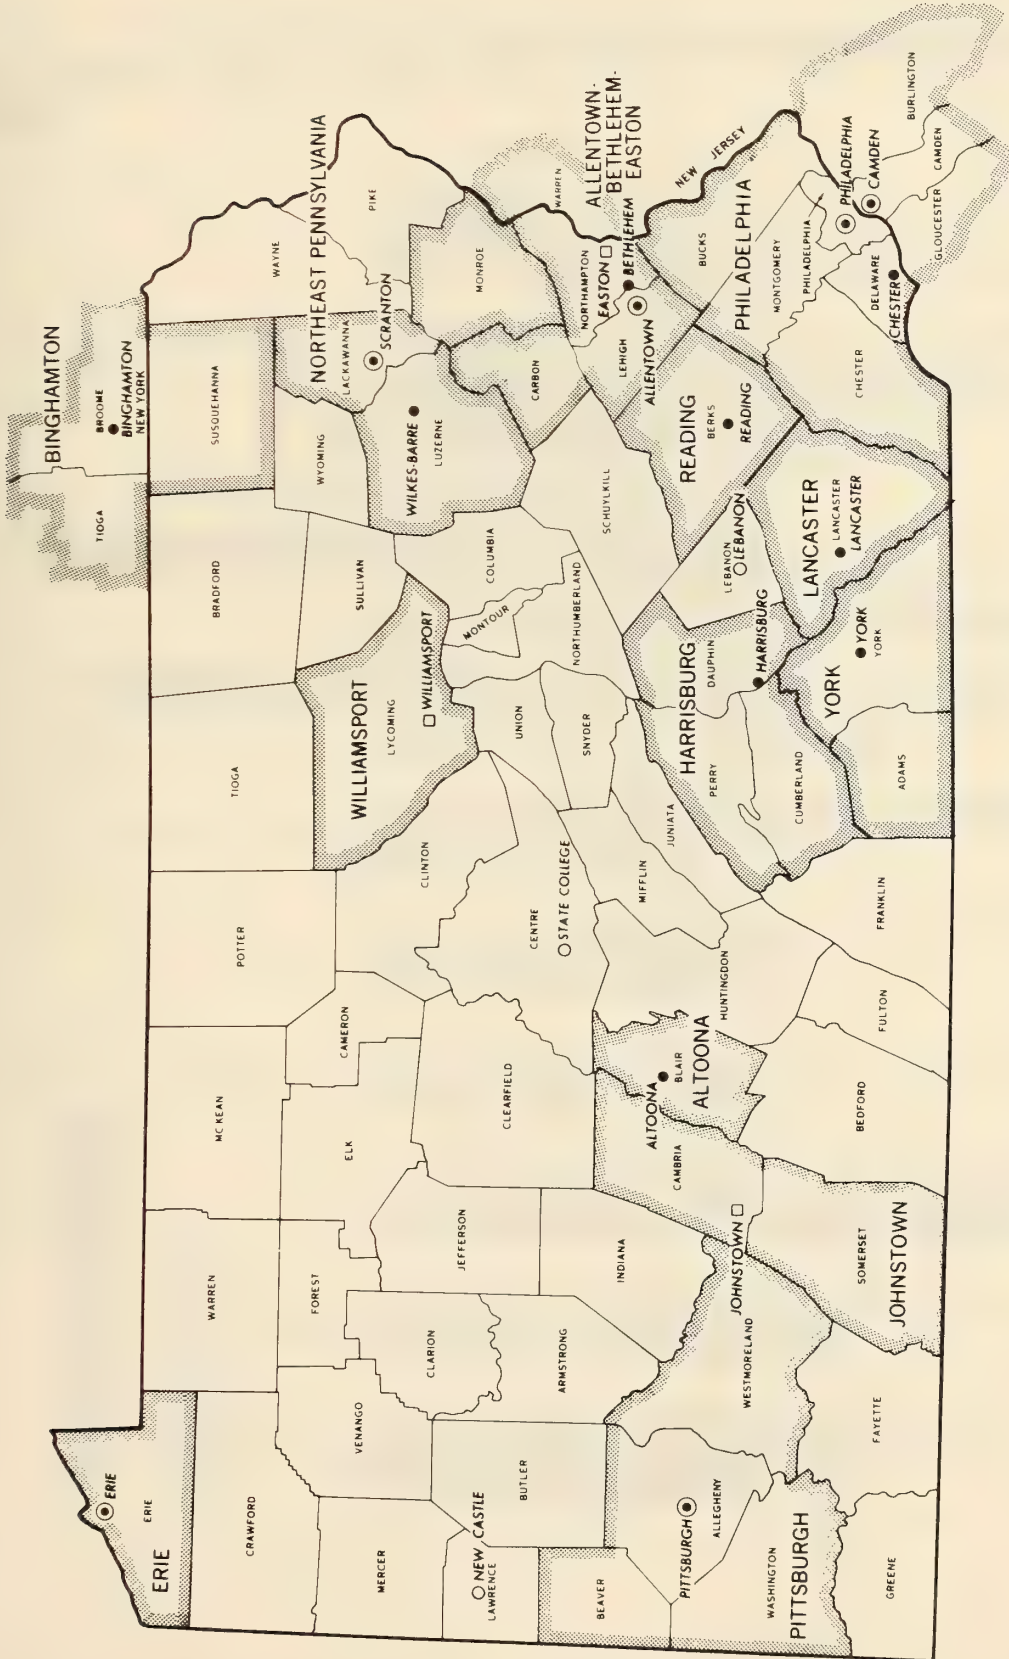

For establishments with payroll in 1977, the sales per employee for retailers in the State averaged \$52,974. Eating places reported sales per employee of \$15,260 which contrasts sharply with the \$121,956 recorded by mobile home dealers.

The 1977 payroll of retailers in the State amounted to \$4.3 billion, up 47.5 percent from 1972. Payroll as a percent of sales of establishments with payroll averaged 12.1 percent for all retailers, 6.7 percent for gasoline service stations, and 24.6 percent for eating places.

There were 676,987 paid employees (full- and part-time) engaged in retail trade in the State as of mid-March 1977. Eating places were the largest employers with 155,833 employees, followed by department stores with 100,487 employees, and grocery stores with 86,564 employees.

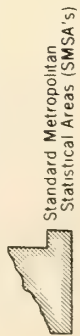

Allegheny County led the counties in the State, accounting for 13.7 percent of total sales by retailers. Philadelphia had the largest sales among the cities in the State, accounting for 11.6 percent.

PENNSYLVANIA

LEGEND

- Places of 100,000 or more inhabitants
- Places of 50,000 to 100,000 inhabitants
- Central cities of SMSA's with fewer than 50,000 inhabitants
- Places of 25,000 to 50,000 inhabitants outside SMSA's
